Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Flitcroft et al. (US 6636833) ("Flitcroft").

Re claim 1: Flitcroft teaches a method of accessing usage parameters associated with a financial transaction account, which comprises the steps of: establishing an account (Figs. 4 and 5, RNs {402 and 502}); issuing a presentation instrument associated with said account (Fig. 5, RN {512}); establishing an initial set of product usage parameters for said account (col. 16, lines 20-23); providing access to said product usage parameters by the account holder (col. 16, lines 20-

23); submitting modified product usage parameters by the account holder (col. 16, lines 26-30); establishing product usage criteria by a card processing and service provider or a card issuer (col. 16, lines 15-18); comparing the submitted product usage parameter modifications with the usage criteria (col. 16, lines 31-34); if the submitted product usage parameters comply with said usage criteria, implementing same in connection with the account (col. 16, lines 31-34); and rejecting the submitted product usage parameters if same do not comply with the usage criteria (col. 16, lines 31-34; col. 18, lines 56-57, col. 23, lines 28-29).

Re claim 2: Flitcroft teaches the step wherein said account comprises a first account, and which method includes the additional steps of: establishing a second account; and forming a group with said accounts (col. 6, lines 45-52).

Re claim 3: Flitcroft teaches designating one of said accounts as a key account; providing primary product usage parameters for said key account; designating the other said account as a dependent account; providing dependent product usage parameters for said dependent account; and providing a holder of said key account with access to and control over the product usage parameters associated with said dependent account (Figs. 4-6, col. 16, lines 15-34).

Re claim 4: Flitcroft teaches creating group master data financial records associated with said group (col. 18, lines 64-67).

Re claim 7: Flitcroft teaches the step wherein said product usage parameters include ranges of

Art Unit: 3691

time during which said presentation instrument can be utilized, geographic restrictions on the usage of said presentation instrument and restrictions on the types of goods and services which can be purchased with said presentation instrument (col. 25, lines 37-39).

Re claim 8: Flitcroft teaches establishing a credit line for said group with a group credit limit; establishing a dependent credit line for said dependent account with a dependent account credit limit; and said credit limits comprising product usage parameters (Figs. 4-6, col. 16, lines 15-34, col. 4, line 59 through col. 5, line 19).

Re claim 9: Flitcroft teaches arranging for the allocation of account payments among said key and dependent accounts; and allocating account payments among said key and dependent accounts (col. 23, lines 45-46).

Re claim 10: Flitcroft teaches providing statements for said key and dependent financial accounts; and providing the key account holder with access to the information provided in conjunction with such statements (col. 10, lines 25-37, col. 24, lines 46-49).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flitcroft as applied to claims 3 above in view of Walker et al. (US 6327573) ("Walker").

Re claim 11: Flitcroft does not explicitly teach reward points for purchases by members of a group. Walker teaches reward points for purchases by members of a group (abstract). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Flitcroft to include this feature as taught by Walker in order to reward customers for loyalty and to create incentives for customer patronage.
